I teach fundamental and advanced concepts of coding, helping them build strong technical skills

RELEVANT PROJECTS

GeoEdu360 Api   08/2023 - till date

- Academic E-commerce Api : I developed a robust backend API that handles user authentication and secure transactions. This API manages user registrations, logins, and sessions, ensuring that only authorized users can access specific features and services.

- Additionally, I integrated a payment gateway to facilitate the purchase of ePINs and other digital services, such as credit card payments. The payment system is designed for secure and efficient processing, providing users with a seamless experience when purchasing academic products.

- The backend also includes a comprehensive transaction recording system that logs every purchase made by users. This ensures accurate tracking and reporting of all financial activities, allowing both users and administrators to monitor transactions effectively.

Tech-Care   06/2024 -11/2024

- Tech Care is a comprehensive personal project that manages and showcases the health records and diagnoses of patients. It provides a centralized platform for securely storing and accessing patient data, enabling healthcare professionals to track medical histories, monitor ongoing treatments, and make informed decisions.

Jons World   01/2024 - till date

- Jons World is a platform The Organization Showcase their offerings and online presence
- The services Jons World provides are : Branding, Web Design Intensive Training, Web Development Training , Graphic designs, Content writing.
-

Fashion-Hub   01/2023 - till date

Fashion Hub is a personal project designed to showcase fashion designers products while also connecting them with their customers. It is a continuous, evolving project, with new features and updates being added regularly to enhance the user experience and expand its offerings.
